What information does the GPS100 provide?

132 Mark Oslund July 13, 2015 GPS100(Discontinued) 0 5.09K

The GPS100 provides the following information:

- latitude and longitude
- time and date
- Course Over Ground (COG)
- Speed Over Ground (SOG)
- magnetic variation
- satellite information

Given this information from the GPS100, Maretron display products (DSM150, DSM200, DSM250, and N2KView) can provide additional information like, sunrise, sunset, twilight AM, twilight PM, and moon phase.
