I see that Maretron’s DSM150, DSM200, and DSM250 displays have a GPS100 configuration setting called "NMEA 2000 PGN Enable/Disable..."; what is this?

163 Mark Oslund July 16, 2015 DSM250 (Discontinued), DSM410, GPS100(Discontinued) 0 6.14K

Maretron’s DSM150, DSM200, and DSM250 displays have a GPS100 configuration setting called "NMEA 2000 PGN Enable/Disable:", which is used to turn on and off specific messages that are transmitted by the GPS100.
