How do I set the J2K100 configuration setting called "NMEA 2000 Engine Instance:" using Maretron’s DSM150 or DSM250 display?

245 Mark Oslund June 2, 2014 DSM200(Discontinued), DSM250 (Discontinued), DSM410, J2K100

You set the J2K100 configuration setting called "NMEA 2000 Engine Instance:" using Maretron’s DSM150, DSM200, or DSM250 display in the following way. Enter menu mode, scroll to "Configuration?" and press enter. Scroll to "Device Configuration?" and press enter. Scroll to the row containing the J2K100 and press enter. Scroll to "NMEA 2000 Engine Instance:" and press enter. Scroll until you find the appropriate instance (single or port engine would be instance 0 where the starboard engine would be instance 1) and press enter.
