My USB100’s COM port is in use by the navigational program on my PC. Can N2KView use the same COM port?

307 Mark Oslund July 17, 2015 N2KView, USB100 0 8.26K

The USB100 can only be in use by one program at a time. The remedy is to have one USB100 gateway for use by your navigational software, and a second USB100 gateway to simultaneously provide data to a vessel monitoring program, such as N2KView.
