I do not see video within N2KView Camera Setup; what does this mean?

553 Mark Oslund July 27, 2017 DSM800(Discontinued), MBB100(Discontinued), MBB200C (Discontinued), MBB300C, N2KView, N2KView Mobile, TSM1330(Discontinued), TSM800(Discontinued) 0 9.66K

If you have set the camera configuration and video still does not appear, please do the following:

- Confirm the PC or Maretron Display is connected to the LAN network a camera is installed.
- Run the Axis Camera Setup tool and confirm that the camera is visible in the list of cameras displayed by the tool.
- Confirm that the IP address of the camera matches the IP address you have set in the Camera Setup of N2KView.
- Confirm that port 80 is not blocked by your computer's firewall software.
