I see that the ALM100 has a fixed tone output of 105 Decibels. With the dampener accesory closed what is the decibel rating?

609 Mark Oslund July 31, 2015 ALM100 0 3.87K

The ALM100 has a low decibel of 97dB when the sound dampener is completely closed. The dampener can be adjusted to support a tone range of 97dB to 105dB.
