I see that Maretron’s DSM150, DSM200, and DSM250 displays have a SSC200 configuration setting called "Magnetic Deviation Calibration?"; what is this?

98 Mark Oslund July 13, 2015 DSM250 (Discontinued), DSM410, SSC200 0 6.40K

Maretron’s DSM150, DSM200, and DSM250 displays have a SSC200 configuration setting called "Magnetic Deviation Calibration...", which is used to calibrate the compass to account for sources of magnetic deviation on the vessel.
